

# SETH GHIN KAI

Cybersecurity & Digital Forensics Student

Singapore · +65 88604971 · 250552U@mymail.nyp.edu.sg · linkedin.com/in/seth-ghin-506414303 · sethghin.com

## PROFILE

Cybersecurity & Digital Forensics student at Nanyang Polytechnic with a developing focus on offensive security, penetration testing and information security. Foundational experience in network security, network scanning, Wireshark, vulnerability assessment, Linux and Python, supported by hands-on cybersecurity programmes and CTF participation. Also experienced in building software independently, including an AI meeting assistant and communication infrastructure for a social platform. Interested in understanding how applications, networks and systems are built, where they can fail, and how security weaknesses can be identified and addressed.

## EDUCATION

**Nanyang Polytechnic — Singapore**

**Diploma in Digital Security and Forensics** · 2025 – 2028

## TECHNICAL SKILLS

|                                  |                                                                                                                                      |
|----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| <b>Cybersecurity</b>             | Network Security · Network Scanning · Vulnerability Assessment · Wireshark · Information Security · Linux · CTF / Security Exercises |
| <b>Programming &amp; Systems</b> | Python · Scripting · Web Development · System Administration                                                                         |
| <b>AI &amp; Data</b>             | AI Automation · Foundation Models · Data Analysis · Data Visualization · Microsoft Excel                                             |

## PROJECTS

### ANTE — AI MEETING ASSISTANT

Solo Developer · In Development · 2026 – Present

- Building an AI meeting assistant designed to support users during live conversations rather than relying solely on post-meeting transcripts or summaries.
- Developing the system independently, including the product interface, application behaviour and AI-assisted workflows.
- Exploring contextual retrieval and low-latency information delivery while keeping the assistant unobtrusive during conversations.

### HOBBYCONNECT — SOCIAL & MESSAGING PLATFORM

Messaging System Developer · Previous Project

- Developed key communication infrastructure for an intergenerational social platform connecting younger users and seniors through shared interests.
- Built multi-user messaging functionality with replies and online status, alongside text-to-speech, speech-to-text and colour-blind accessibility features.

### SECURITY & CTF

Student & Participant · Ongoing

- Building practical foundations in offensive security through cybersecurity exercises and CTF participation.
- Developing experience with network analysis, vulnerability assessment, security tools and structured problem solving.
- Applying Digital Security and Forensics coursework to practical security scenarios while developing toward penetration testing and ethical hacking.

### NEGOTIATOR — AI NEGOTIATION & SAVINGS

Developer · Archived

- Developed a web application that analysed bills, contracts and salary offers and generated personalised negotiation strategies and scripts.

## PROGRAMMES & CERTIFICATES

**YCEP — Youth Cyber Exploration Programme** — Certificate obtained · Cybersecurity / CTF

**YDCP — Youth Digital Currency Programme** — 2024 · 120-hour programme · Data Analytics & Web Application Development

**Beijing Exchange Programme** — 2025 · Certificate obtained

## EXPERIENCE & LEADERSHIP

### SINGAPORE YOUTH FLYING CLUB

Student Pilot · 2025 – 2026

- Developed structured decision-making through flight training, with emphasis on risk assessment, situational awareness, procedures and operational discipline.
- Practised evaluating changing situations systematically and making deliberate decisions under time pressure.

### CATHOLIC CHURCH OF DIVINE MERCY

Vice President, Altar Servers Ministry · 2023 – Present

- Organise duty schedules and support coordination of ministry activities, training and services.
- Mentor junior members and help maintain procedures, professionalism and teamwork.
- Coordinate activities and events with clergy and church staff, developing leadership, communication and organisational skills.

### HAIDILAO — VIVO CITY, SINGAPORE

Kitchen Assistant · 2025

- Worked in a high-volume operational environment requiring consistency, communication and teamwork.

## ADDITIONAL CERTIFICATIONS

- AWS — Essentials of Prompt Engineering · 2026

- AWS — Optimizing Foundation Models · 2026
- Anthropic — AI Fluency: Framework & Foundations · 2026
- IBM — Web Development Fundamentals · 2025

## INTERESTS

Offensive Security · Penetration Testing · Application Security · Network Security · Digital Forensics · Security Research · Secure Software Development
